“As to methods there may be a million and then some, but principles are few. The man who grasps principles can successfully select his own methods. The man who tries methods, ignoring principles, is sure to have trouble.”

- Harrington Emerson

Keep track in 15 minute increments for 1-2 weeks.

Non-Dollar Productive

Dollarizing Your Inefficiencies

Second, pick the top two in which you would no longer want to be involved:

The Not-To-Do List

The to-do list is not the best way to approach maximizing productivity. The not-to-do list is. Now, a not-to-do list will create a to-do list, but what you end up doing is the stuff to get you away from the stuff you shouldn't be doing, but are doing anyway. How do you come up with your not-to-do list? Track your time for 10 days and you will become painfully aware of what not to do.
